

THE MONEY YOU'VE EARNED. COLLECTED ON YOUR TERMS.

We find why each invoice isn't paid, resolve it, and collect it.

Most AR software automates reminders. collects.io does the work behind a late payment: the missing PO, the reference that doesn't match, the dispute nobody logged. Emails go from your own mailbox, inside controls you set.

1 You stay in control

Limits, pauses and blackout dates at every level. Formal notice always waits for you.

2 Pay only for results

The per-invoice fee is charged only on invoices we collect.

3 Built by accountants

Designed with more than 40 UK businesses and their CFOs.

4 Every number has a denominator

Each figure below states what it is measured against.

381 of 488**steps resolve rather than remind**

Reminder tools do the other 107. Mapped from 83 AR failure patterns.

90%**of the work not reserved for a person**

356 of 396 steps, in assist mode. The 75 steps a person owns stay with you.

96.6%***of actions completed without a person**

1,174 of 1,215 on our first live customer's book, 30 days to 2 Sep 2026.

Control at every level

- **Your organisation:** sending limits and blackout windows. Nothing goes out at weekends, on bank holidays or on dates a customer asked you to avoid.
- **Each customer:** Do Not Disturb stops every invoice, with the reason logged.
- **Each invoice:** pause with a logged reason; disputes, promises to pay and payment plans hold reminders on their own.
- **Escalation:** reviews at day 14 and day 60; the day-90 formal notice always waits for an owner or admin.

Lower cost and lower risk than a hire

A credit controller is a fixed salary from day one, whether or not cash comes in, plus recruitment, notice and absence cover. With Collect you pay a per-invoice fee only when an invoice we acted on is paid, and the platform fee is published and set by the number of invoices you issue.

What it costs

Example	Invoices a year	Collect £ a year
£4m agency	300	£1,743
£5m services	1,000	£5,033
£10m contractor	2,000	£10,913
£12.5m producer	3,670	£18,755.50
£50m group	10,000	£47,803

Platform fee by invoices a year (£9 to £6,749 a month, the same as Visibility) plus £3.25 per invoice collected, falling to £2.25. Examples assume every invoice is collected, e.g. £768 + 300 × £3.25 = £1,743. Excludes VAT. 12-month plan from the day you move to Collect. No percentage of turnover or of what we collect. No minimum fee.

An invoice we collect is one we took a recorded action on and that was then paid. Nothing is charged on credit notes, live disputes, consumer invoices or anything paid before we acted.

Start with two weeks of Visibility, free. Move to Collect in one click.collects.io/start · hello@collects.io
