

THE MONEY YOU'VE EARNED. COLLECTED ON YOUR TERMS.

See why every invoice isn't being paid.

Xero tells you what you're owed and how old it is. Visibility tells you why it isn't being paid, what was done about it and what it's worth, across 29 analytics on your own ledger. Nothing is ever sent to your customers.

1 Read-only

We read your Xero ledger.
We never write to it.

2 Your data stays yours

Hosted in the UK on AWS
London. Never used to
train our models.

3 Built by accountants

Designed with more than
40 UK businesses and
their CFOs.

4 Safe AI

Acts only inside rules you
set. A person owns every
exception.

What you see: 29 analytics, 19 of them not in Xero

The risk and exception layer

- 11 health checks on every invoice (contact, PO, reference, VAT, duplicates and more), each with the fix
- 28 pre-send checks; blocked, review and dispute queues; dispute pipeline
- Statutory interest building on your overdue book

The work record

- Every action taken and why, what was handled without you, and the decision trail on every invoice
- Problems caught with the money at risk; time and money handed back

The value layer

- Collection rate over 30 days; your cost of credit control, which prices the time handed back

Full list: the Visibility feature list. Plus the 10 you know from Xero, gone deeper: ageing, priority queue, a cash forecast from how each customer has paid you before, progress against your day-one baseline, expected payment dates, customer risk ranking and a 360° view of each customer.

Two weeks free, then priced on your invoice volume

Invoices a year	£ a month	£ a year
300	£64	£768
1,000	£159	£1,908
2,000	£399	£4,788
3,670	£649	£7,788
10,000	£1,619	£19,428

From £9 a month (up to 150 invoices a year) to £6,749 (27,001 or more); full ladder at [collects.io/pricing](#). We read your invoice volume from Xero when you connect. Prices exclude VAT. Card checked at Xero connect with a £1 charge, refunded. On day 14 Visibility continues, with notice, on a 12-month plan billed monthly, unless you switch off before then. 20% off for annual prepayment.

Our promise. Published prices, the same for everyone at your invoice volume. No percentage of turnover, ever. Nothing is sent to your customers on Visibility.

How it works

1 • Connect

Sign in with Xero and choose your organisations. Read-only, under five minutes.

2 • See

Your 29 analytics build from your own ledger: why each invoice is unpaid, what is blocked, what it is costing you.

3 • Decide

Keep collecting yourself, or move to Collect in one click and let us resolve and collect, inside controls you set.

"When I sold my last company, the buyer found an extra £1m in the debtors ledger: already earned, already invoiced, not collected. collects.io exists so that never happens to you."
